

The diagram illustrates a system architecture within a main container 10. Inside this container, there is a **Key Repository** (24) which holds a **Protection Key** and an **Integrity Key** (22). A **Database** (30) containing **Enterprise Credentials** (32) is connected to the Key Repository. **Application(s)** (40) are also connected to the Key Repository. A **Gateway** (60) is connected to the Key Repository and a **Certification Authority** (70). An **Enterprise** (31) is connected to the Database, and **Consumer(s)** (50) are connected to the Applications.
